

# Extreme Clean From Applied Cleansing Solutions With the Titan Pro Dry Vapour Steam

The **Titan Pro** is a **convenient, easy to manoeuvre and powerful cleaning solution** that uses dry vapour steam and state-of-the-art equipment to give your biggest and toughest cleaning challenges an extreme clean. Not just meeting – but exceeding - all HACCP and food regulatory requirements, the Titan Pro unique equipment is proven to give you the highest levels of sanitation and hygiene possible. **Floors, equipment, grouting, walls, ceilings, showers, glass, mattresses and windows** will be quickly, easily and reliably cleaned and disinfected.

## How does it work?

Specialised cleaning tools help dry vapour steam molecules penetrate even the smallest pores, **killing bacteria** and **forcing dirt and debris to the surface** – without any chemicals! When an extra cleaning boost is needed, a small amount of food-safe detergent is injected to **suspend the dirt**. Dirt and debris are vacuumed away, leaving **slip-free, instantly dry, sanitised surfaces**.

## What are the benefits?

- ✓ **Exceed** HACCP and all food hygiene requirements
- ✓ **Sanitise** Without using harsh chemicals
- ✓ **Reduce** cleaning time with instant-dry surfaces
- ✓ **Extend** the life of your appliances and equipment
- ✓ **Eliminate** detergent build-up for slip-free floors
- ✓ **Save** money on water and chemicals
- ✓ **Increase** the efficiency of your staff
- ✓ **Be** environmentally friendly

## Who does the Titan Pro suit?

The Titan Pro is suitable for a wide array of users ranging from healthcare environments, hospitality sector, small food and beverage manufacturers and professional cleaning contractors that need a convenient, easy to manoeuvre and powerful cleaning solution.

Technical Specifications	
Maximum Pressure	7.5 Bar / 109 PSI
Maximum Temperature	162°C / 326.6°F
Steam Output (Water)	56gr./min. 3.36lt./hour
Water Tank Volume	5lt. PET Canister
Electric Heating Power	2200Watt
Boiler Volume	2.9lt.
Heating up time	9 Minutes
Total Power	2250W – 10A
Voltage	240V – 50Hz
Boiler Material	Stainless Steel AISI 304
Dimensions (mm)	700 x 450 x 1100
Net Weight	25kg
Dry Steam Regulation	Manual – 0 to maximum
Detergent Function	YES
Detergent Tank Volume	1 x 5lt. PET Canister
Vacuum	YES
Vacuum Power	1200 Watt
Vacuum Container Volume	9lt.
Length Power Cable	4 Metres
