

# Litter Master™ 9000

Litter Master™ is a Council, landfill and outdoor cleaning machine for rapid vacuum collection of general litter such as cans, cardboard, wrappers and cigarette butts, packaging and plastic bottles etc. It is also a perfect collection tool for wind blown

Litter Master™ 9000 is the solution to rapidly recover various kinds of scattered plastic or paper litter, plant waste, loose fibres, nuts, seeds and other granular materials. Used typically by Councils, outdoor litter cleaning contractors and horticultural operators etc.

The horizontal rear loading vacuum chamber layout allows it to use low cost disposable, 400 litre capacity, collection bags. The suction is drawn through the collection bags under high volume, high pressure airflow that allows the bags themselves to act as the air filters. This technique eliminates engine damage & rapid impeller fan wear associated with alternative models. There are no complex moving parts and the vacuum is intrinsically safe to operate.

The various components of this Australian designed machine have been developed and tested over the past five years.

Litter Master™ will be of immediate benefit as a time saving tool that will assist your staff to clean far more efficiently than with present manual methods.

## TECHNICAL SPECIFICATIONS

Engine	21 hp key start Vanguard unleaded engine
Electricity	12 volt sealed battery for engine starting motor
Material of Body	Stainless steel
Waste Bag Capacity	400 litres
Inlet Diameter	203mm
Vacuum Fan	Alloy 19 hp hi flow
Engine/Vacuum Fan	Direct engine shaft coupled
Vacuum Fan Scroll	Stainless steel 5 mm thick
Vacuum Hose Diameter	203mm
Vacuum Hose Length	10metres
Hand Vacuum Wand	Alloy 203mm diameter
L x W x H	2100 x 750 x 750 mm
Weight	220 Kg

# Litter Collection made *easy*

## STANDARD & OPTIONAL FEATURES

- Extremely high airflow
- Unique, high static pressure, 12 blade turbo impeller fan
- Electric start Unleaded engine
- Optional Hose boom 3.5m long with 10m of Anti-Static, 8 inch Polyurethane hose
- Straight through suction means no impeller to snag
- Zero abrasion fan wear unlike typical leaf/litter vacuums
- Low cost, quick change, 400L capacity dust filtered collection bags
- Ergonomic & light weight vacuum wand
- Litter bags feature inbuilt drawstring closure
- Intrinsically safe, fully enclosed rotating impeller fan
- Simple to use OH&S safe design
- Fully supported with 12 Month Warranty
- Stainless steel construction
- Robust construction
- Integrated forklift pocket chassis
- Australian Made
- Optional Boom

## TYPICAL APPLICATIONS

- Rapid car park, highway and roadside litter cleanup
- Landfill wind blown litter collection
- Faster public space post event litter clean up
- Rubbish clean up without labour intensive brooming or shoveling
- Vacuum leaf & litter over parked vehicles
- Cellulose and rock wool fiber based insulation vacuuming
- Drainage channel built up leaves and light rubbish removal
- Bulk leaf and plant waste vacuuming. Ideal for Councils
- Ideal as a multi-purpose rubbish clean up vacuum
- Property maintenance and general outdoor area cleaning
