

STATIONARY SYSTEMS & INTERCEPT HOPPERS

Power Packs™ Interceptor Hoppers

- 10hp tp 75hp
- Ease of service
- Electric, Diesel or LP Gas

A Multi-Vac Intercept Hopper can be used to reclaim picked-up material. Material drops out of the air-stream into the hopper. The remaining dust & fines continue on and are collected at the main unit.

- Stationary or forklift portable
- Can be installed in many configurations
- Hopper full shut down probe
- Standard and custom units available

A Multi-Vac Stationary System can power a manifold system throughout the entire plant. A Multi-Vac Intercept Hopper can be added to the vacuum line to collect reusable

Stationary System shown with optional service platform

Standard Features

A Multi-Vac Stationary System can be used as a central vacuum cleaning system, batching, continuous discharge, loading or unloading.

- On ground controls for easy access
- 453 Litre to 3823 Litre capacities
- “No tools required” filter/cage removal system
- Dual inlets
- Power a manifold system throughout the plant with multiple hose inlet points.

Stationary Series Models

Model	HP	Air Flow	Air/ Cloth Ratio
Mini 1000S	10	270cfm @ 14"hg	2.4
Mini 1500S	15	355cfm @ 14"hg	3.1
Mini 2000S	20	440cfm @ 16"hg	3.9
Mini 2500S	25	600cfm @ 16"hg	5.3
Mini 3000S	30	720cfm @ 16"hg	6.3
Mini 4000S	40	860cfm @ 16"hg	5.4
Mini 5000S	50	1250cfm @ 16"hg	7.9
Mini 3000S	30	720cfm @ 16"hg	2.5
Mini 4000S	40	860cfm @ 16"hg	3.0
Mini 5000S	50	1250cfm @ 16"hg	4.4
Mini 7000S	75	1550cfm @ 16"hg	5.5
